

Medical Report

Diagnosis: Multiple cherry angiomas

Details: The image shows multiple small, round, bright red papules scattered across the patient's

Accuracy: 95.0%

Recommendations:

- * No treatment is necessary unless the patient desires cosmetic improvement.
- * If the patient desires removal, options include laser treatment, cryotherapy, or surgical excision.
- * Monitor for any changes in size, color, or texture of any of the lesions.
- * If any lesion changes significantly or becomes symptomatic, seek immediate medical attention.
- * Consider referral to a dermatologist for further evaluation and treatment options if desired.
